DeFi is set for exponential growth but some of the main issues remain...

Complex user experience

No new liquidity

High barriers to entry

Many crypto projects set themselves up for failure with...

- ✗ Unsustainable APYs & Native Token inflation
- ✗ Providing No HARD CRYPTO returns
- ✗ Over Leveraging
- ✗ Native Token only as an access fee to use service
- ✗ Gambling with customer funds
- ✗ Focus on short term profit vs sustainable growth

The industry boomed but DeFi didn't deliver what it promised...

Full Transparency

Open Ecosystem

Trustlessness

Simplified Investments

**The most profitable
DeFi investment
strategies are only
suitable for technically
advanced users.**

Everyone wants to get in, without knowing how. This has led to an exponential growth in centralized asset management platforms and hedge funds.

Liquidity remains in these operators creating structural risk for the whole ecosystem.

Individual users are exploited with promises of false enrichment that ends in disaster due to protocols being built around the benefit of early users instead of the strengthening of the protocol.

Hyperdex targets various user groups and is able to scale through networks and revenue models that benefit all parties.

Each of them will onboard their own client base to the platform, creating growing networks of networks

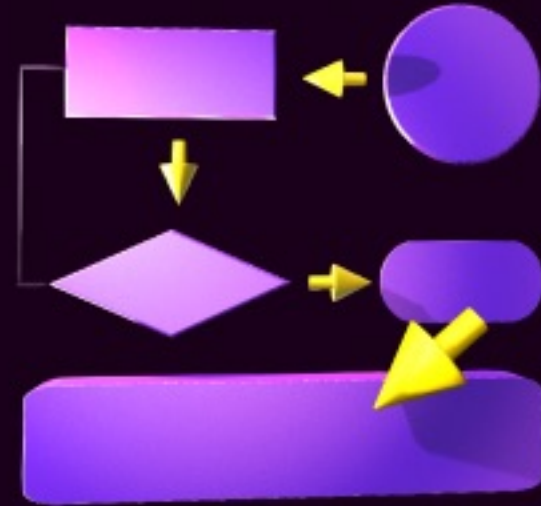

What we Offer

Fixed Income

Earn a fixed return on stablecoin and crypto assets through a variety of Fixed Income Cubes.

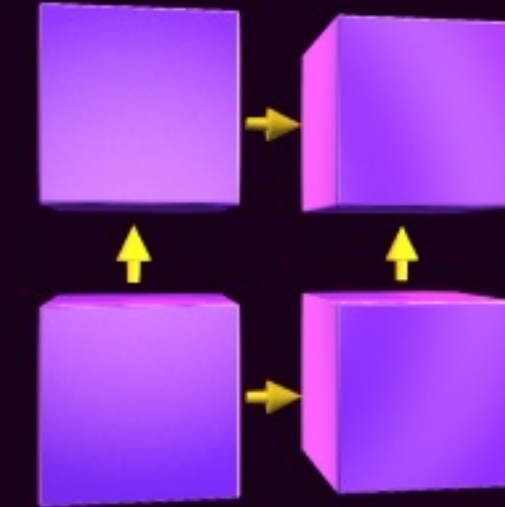

High Yield

On chain derivatives markets on the main crypto coins.

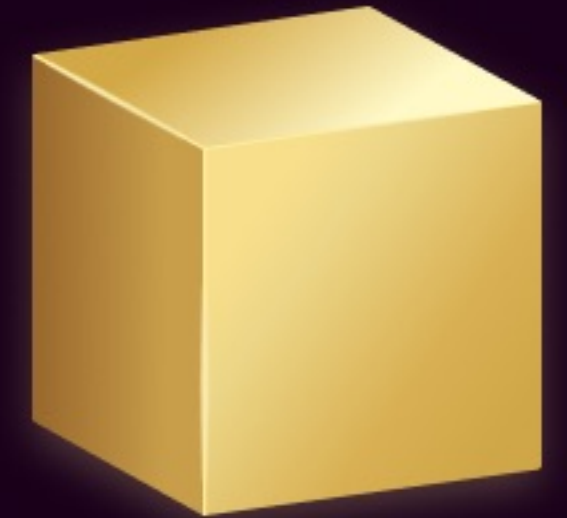

Options

Earn a variable return by speculating on the price of select crypto assets.

Modular

Create your own trading algo for others to invest in all without any prior coding experience.

Gold

Buy and sell NFTs 100% backed by gold, or redeem them for the physical gold.

Highlights

Sustainable APRs 6-20% paid in HARD crypto.

Additional Mint On Demand reward mechanism to minimize token minting and maintain the value of HYP token.

Interact with the best DeFi strategies with just a few clicks.

“Not your Keys. Not your Coins”

**With Hyperdex, the user is
always in control.**

P2P Lending

- | Hyperdex is a guarantor, simply matching counterparties with each other.
- | Peers decide all terms and Hyperdex smart contracts enforce them.

Swaps

- | Hyperdex focuses on building permanent liquidity for the platform.
- | Own Router to keep the swap fees inside the platform and rewarding LP providers and users.

Hyperdex is built on BSC and operates transparently through **Smart Contracts**.

- | Bringing new capital primarily for BSC from TradFi.
- | Growing demand for BUSD (transak direct purchase).
- | New on-chain users.
- | Increasing BSC exposure.
- | Volume on BSC and Binance CEX.

Hyperdex only has one systemic risk:

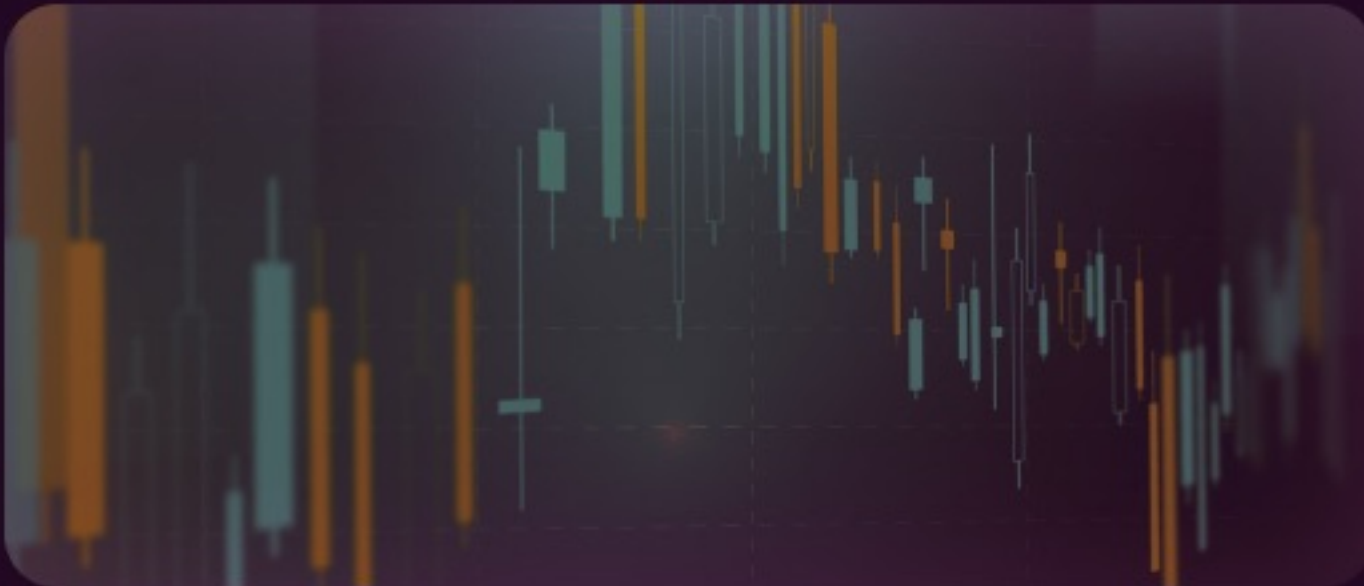

Hyperdex is BEAR MARKET PROOF

The platform has launched and has already attracted new users.

Hyperdex generates profit for the Users and the Company.

Our success is not dependent solely on the HYP token performance.

Hyperdex has a Total AUM of 1 MIL USD and 50 MIL pledged from negotiations.

Additional funding is sought to scale rapidly and grab market share from the lucrative market.

First-Hand Experience.

Hyperdex amasses vast experience in traditional finance, banking regulation, trading systems, cryptocurrencies, and blockchain.

Partnering with a leading cryptocurrency lawyer buffet in Switzerland, Amber Market Makers and leading PR and Marketers in the space.

Daniel Ivascyn

CIO @ PIMCO

"Now we're looking at potentially trading certain cryptocurrencies as part of our trend-following strategies or quant-oriented strategies, then doing more work on the fundamental side."

Bank of International Settlements

Second consultation on the prudential treatment of cryptoasset exposures

"The Bank for International Settlements (BIS) intends to extend its hand to the new asset class by allowing banks to hold up to 1% of reserves in cryptocurrencies such as Bitcoin (BTC)."

Michael Sonnenshein

CEO @ Grayscale

"We are spending time with politicians, and some of the largest pensions and endowments focused on diversifying their portfolios and actively exploring crypto allocations."

Bitwise®

The Bitwise/ETF Trends 2022 Benchmark
Survey of Financial Advisor Attitudes Towards
Crypto Assets

"Of 200 key global family office personnel surveyed, 77% said their firms were exploring or investing in cryptocurrencies, with one out of five describing themselves as active investors."

Hyperdex Cubes

Total crypto market historical data (all Binance crypto price variations both spot and futures)

All historic transactions made by High Yield & Options Cubes

Total Historical Data

300GB

Data added per day

50MB – 100MB

User Data

Each user will have an initial data requirement for Modular Cubes including name, charts, performance, the option to save and export PNL pictures, and more.

Initial Data Requirement

1MB

Data added per day

100KB

Scaling

After reaching several hundred users, more databases will be needed to manage multiple Modular Cube API requests in parallel to prioritize speed.

Predicted data added daily

20MB

Predicted data added yearly

7.3GB

1 Multi Chain DeFi Protocol

Multi-chain platform to be built on several EVM chains (e.g. Fantom, Avalanche, etc.)

2 Simplified Investment Cubes

Choose from simplified investment types created and offered by HyperDex.

3 Safe P2P Lending

Borrow or loan digital assets with other users using the Peer-to-Peer Loan Exchange.

4 TradFi Meets DeFi

Licensing and compliance of TradFi with the freedom of DeFi

5 DAO Transition

Vote on development changes made to HyperDex via the Tesseract Governance Token.

6 NFT Crossover Interactions

Use the native HYP token + HyperDex NFTs to enhance your overall experience.

Access a wide variety of investments that include an extensive range of different assets

Invest via Hyperdex Cubes

Each cube has its own audited smart contract functions with respective details and info pertaining to the specific investment.

Modular Cube

Create and deploy your own trading strategy for others to invest in while you earn rewards.

Fixed Income Cube

Earn a fixed return on both stablecoin and crypto asset deposits.

Options Cube

Speculate on the future price of crypto asset, similar to a future contract.

P2P Loan Exchange

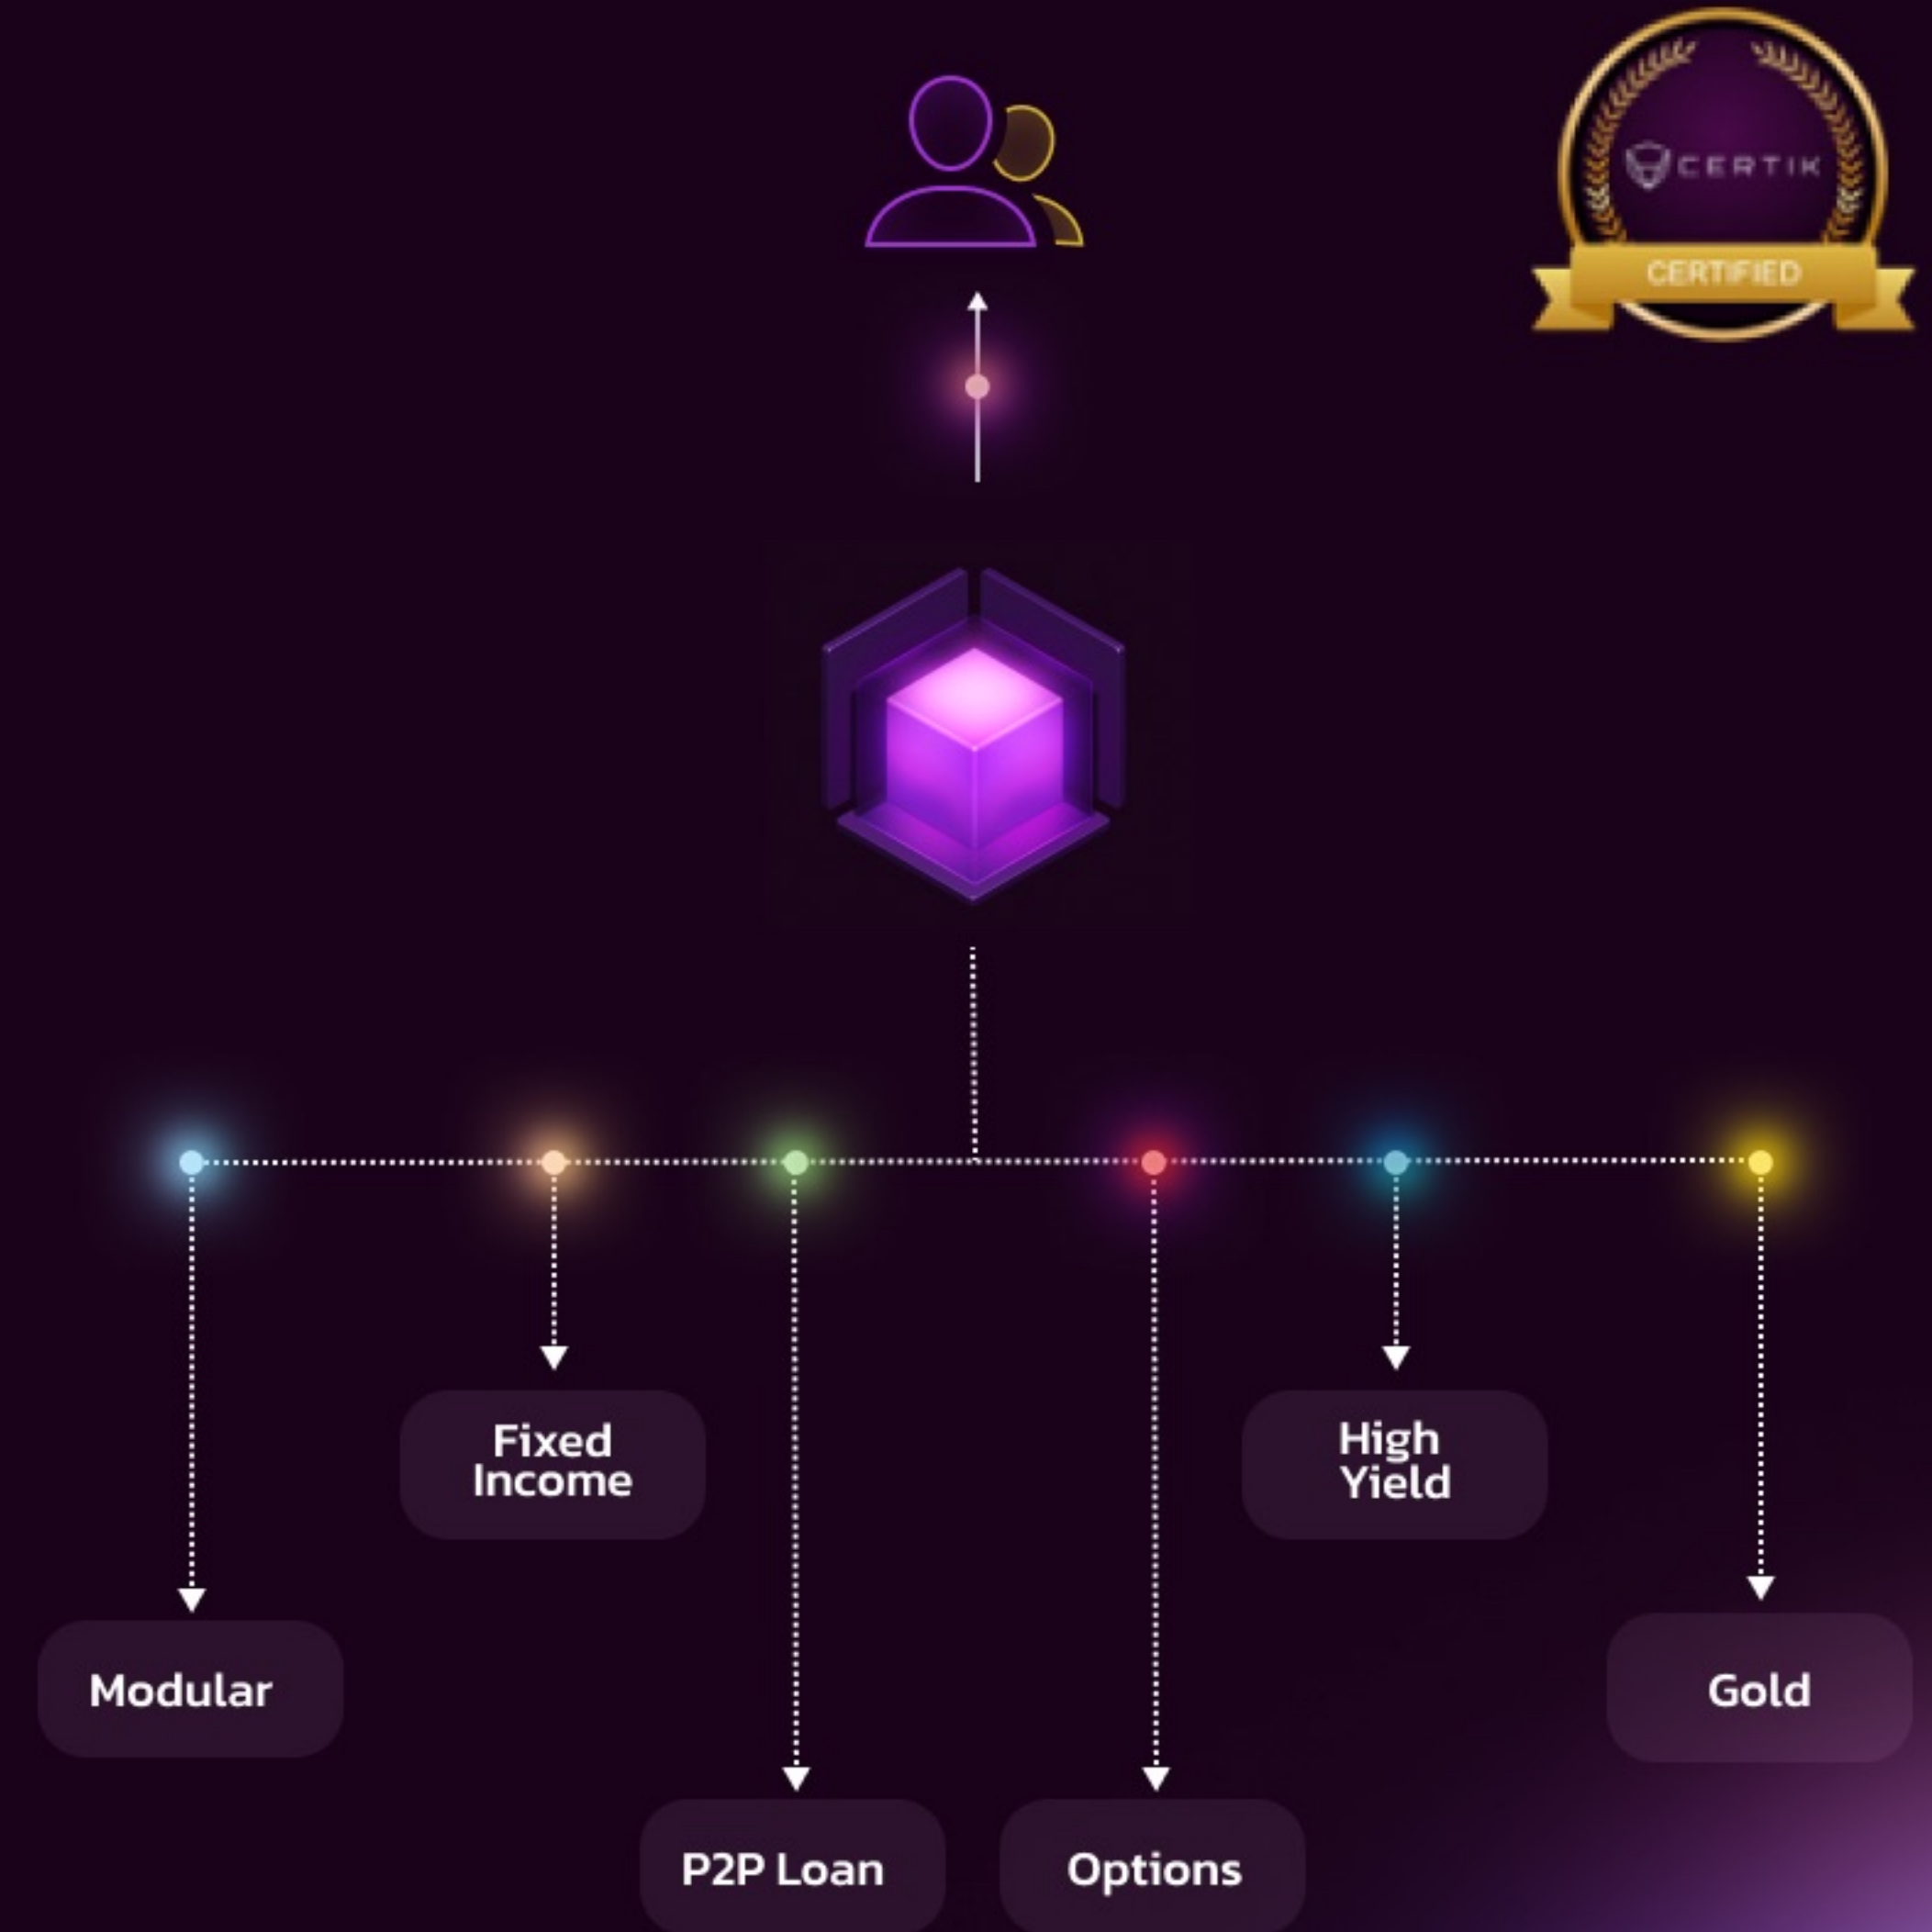

Borrow and loan crypto assets amongst other Hyperdex users.

High Yield Cube

Earn a variable return based on the performance of Hyperdex trading algorithms.

Gold Cube

Purchase cryptographic tokens backed by physical gold.

Investment Cubes

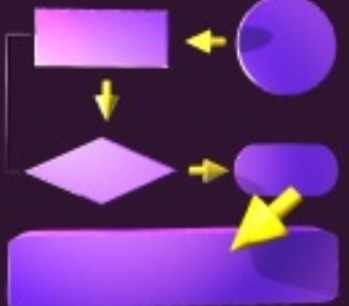

Investment Cube types include Fixed Income, High Yield, Options, Modular, and Gold.

For some Cube type there are sub-cubes to choose from that contain different details pertaining to the investment type.

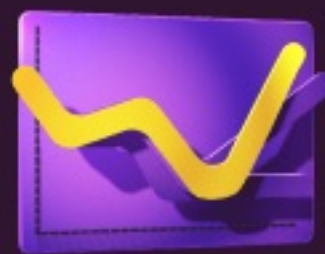

These details include deposited assets, expiration dates, returns, and more.

HyperDex Ecosystem

Hyperdex includes other features such as the Token Swap, Farm, and a Referral Program.

Token Swap

The Token Swap enables users to deposit liquidity and earn fees from swap transactions.

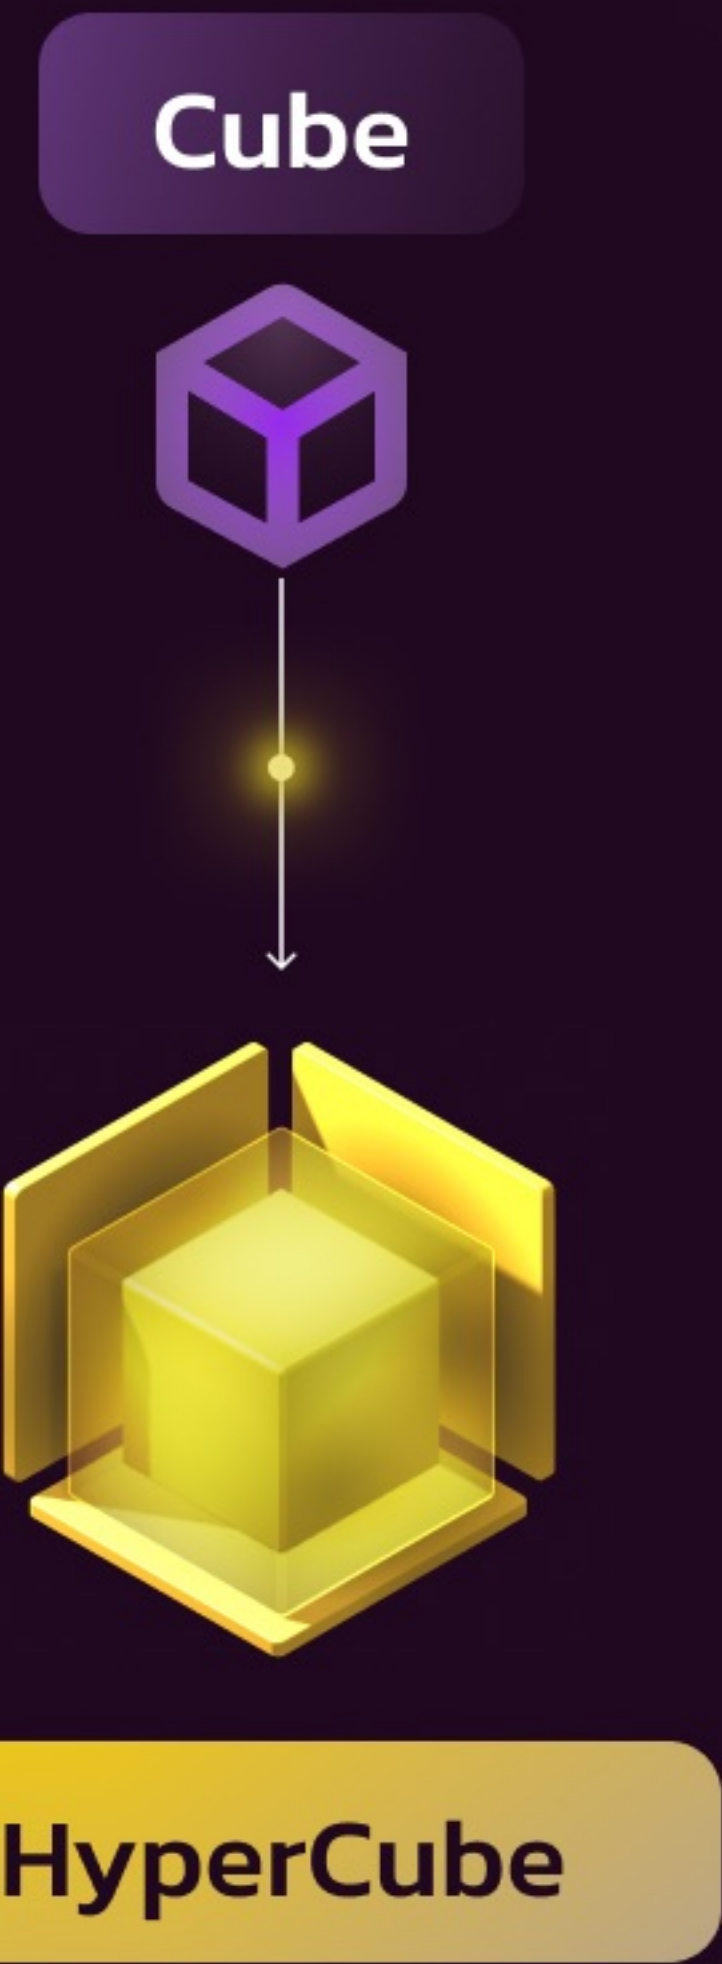

Farm

The Farm enables users to deposit LP tokens and earn rewards.

Referral Program

The Referral Program rewards users that successfully refer new users to Hyperdex.

HyperCubes ultimately increase overall returns for each “Cube” type

Upgrade ‘Cubes’ to ‘HyperCubes’ by depositing Hyper (HYP) Tokens.

HyperCube Benefits

Fixed Income HyperCube

- Increases fixed return
- Additional return on HYP deposit

High Yield HyperCube

- Lower fees
- Doubles returns (distributed in HYP tokens)

Options HyperCube

- Doubles returns (distributed in HYP tokens)

Modular HyperCube

- Doubles returns (distributed in HYP tokens)

Fixed Income	High Yield
Options	Modular

NET APR 7.96%

HyperCube

BUSD

APR 9.00%

HYPE APR 20.00%

NET APR 14.43%

Hyper Token (HYP) is the native Hyperdex token.

HYP is created with the intention of enhancing the utility and productivity of the Hyperdex platform.

NAME	Hyper Token
SYMBOL	HYP
TYPE	BEP-20
SUPPLY	Inflationary
CHAIN	BSC

HYP Tokens are only minted when a HYP reward is due.

Each of these events require the prior purchasing of HYP, effectively increasing the demand and therefore price of HYP before minting more.

HYP rewards are quoted in USD and distributed in HYP, meaning the higher the price of HYP the less tokens needed to mint.

HYP rewards are due when...

A HyperCube earns a return

A HYP fixed income cube earns a return

Participating in the Farm

Participating in the Referral Program

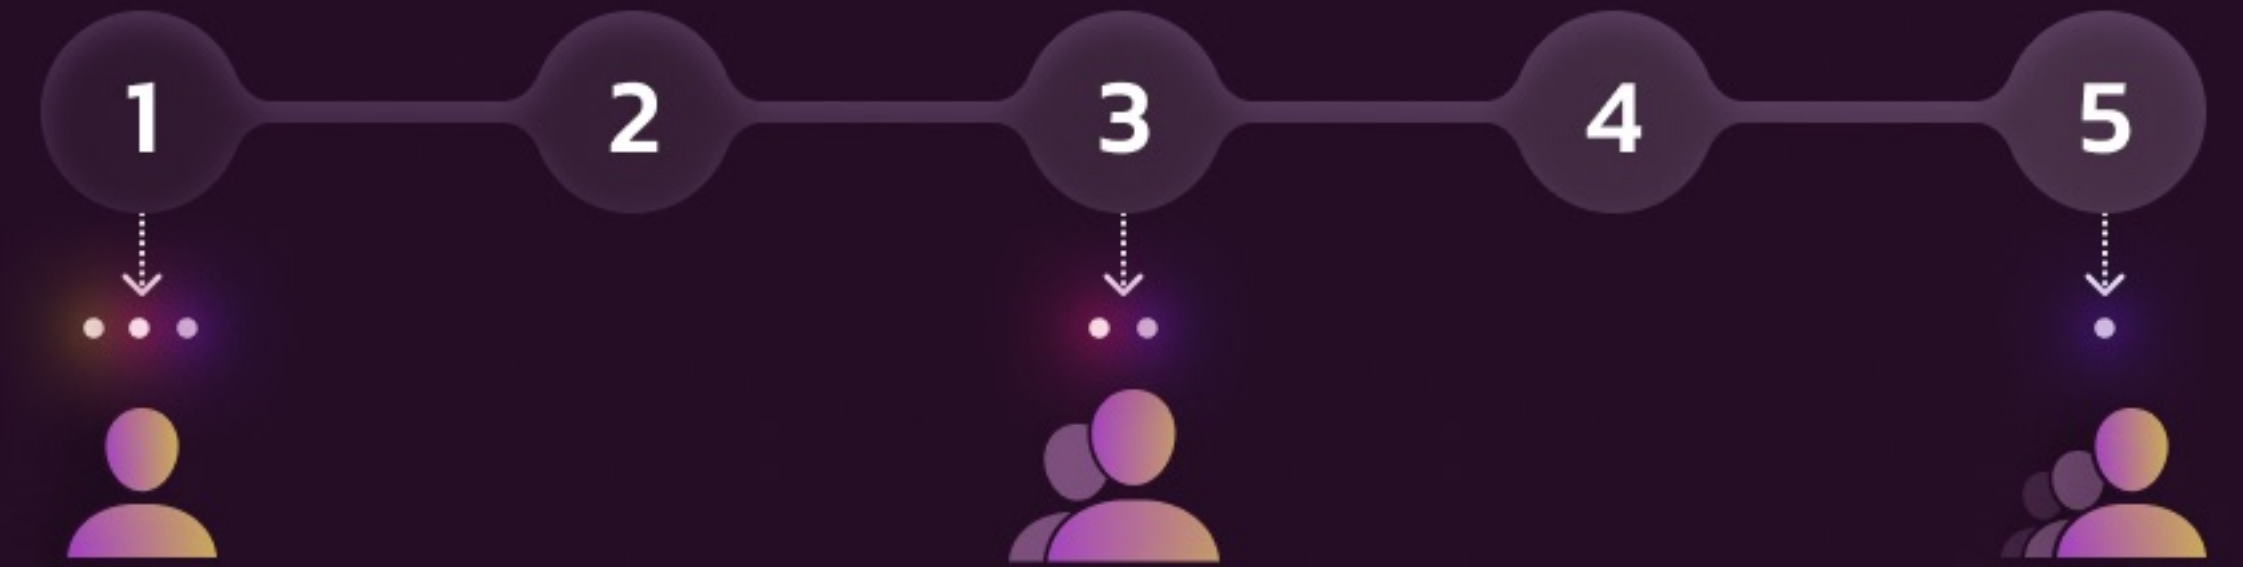

Minting Mechanism

Other Protocols

Other Defi Protocols continuously mint large amounts of their token on a per-block basis.

HyperDex

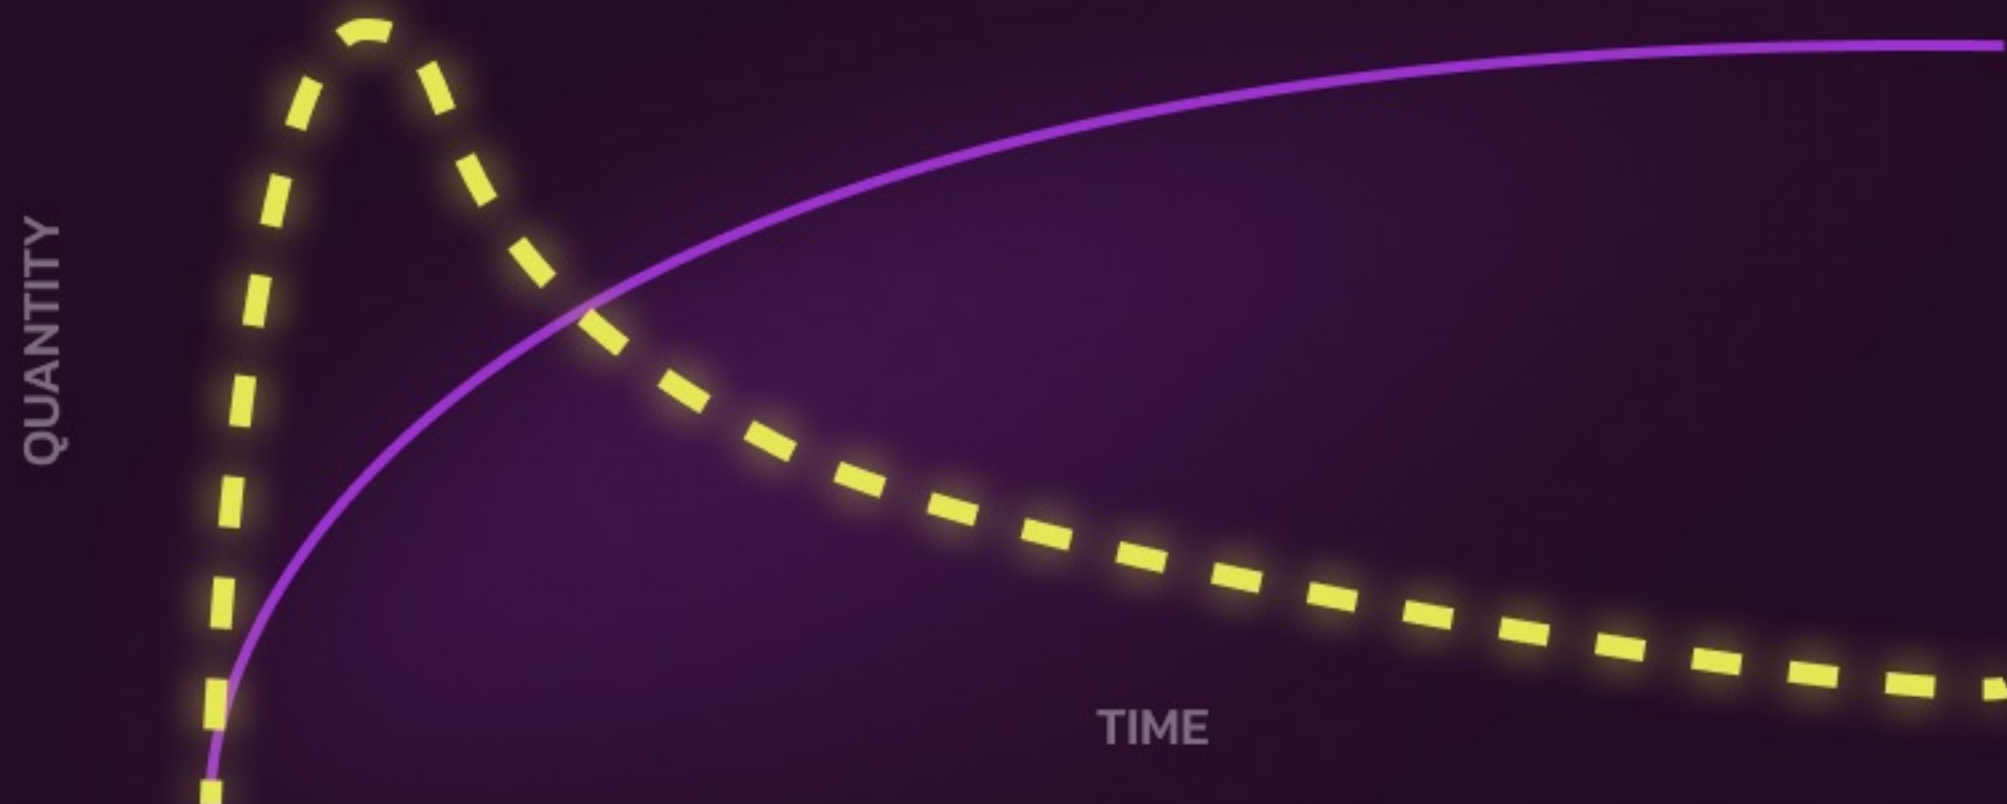

Hyperdex only mints HYP Tokens on certain conditions when a HYP reward is due. As the price of HYP increases, less tokens are minted.

Price and Supply

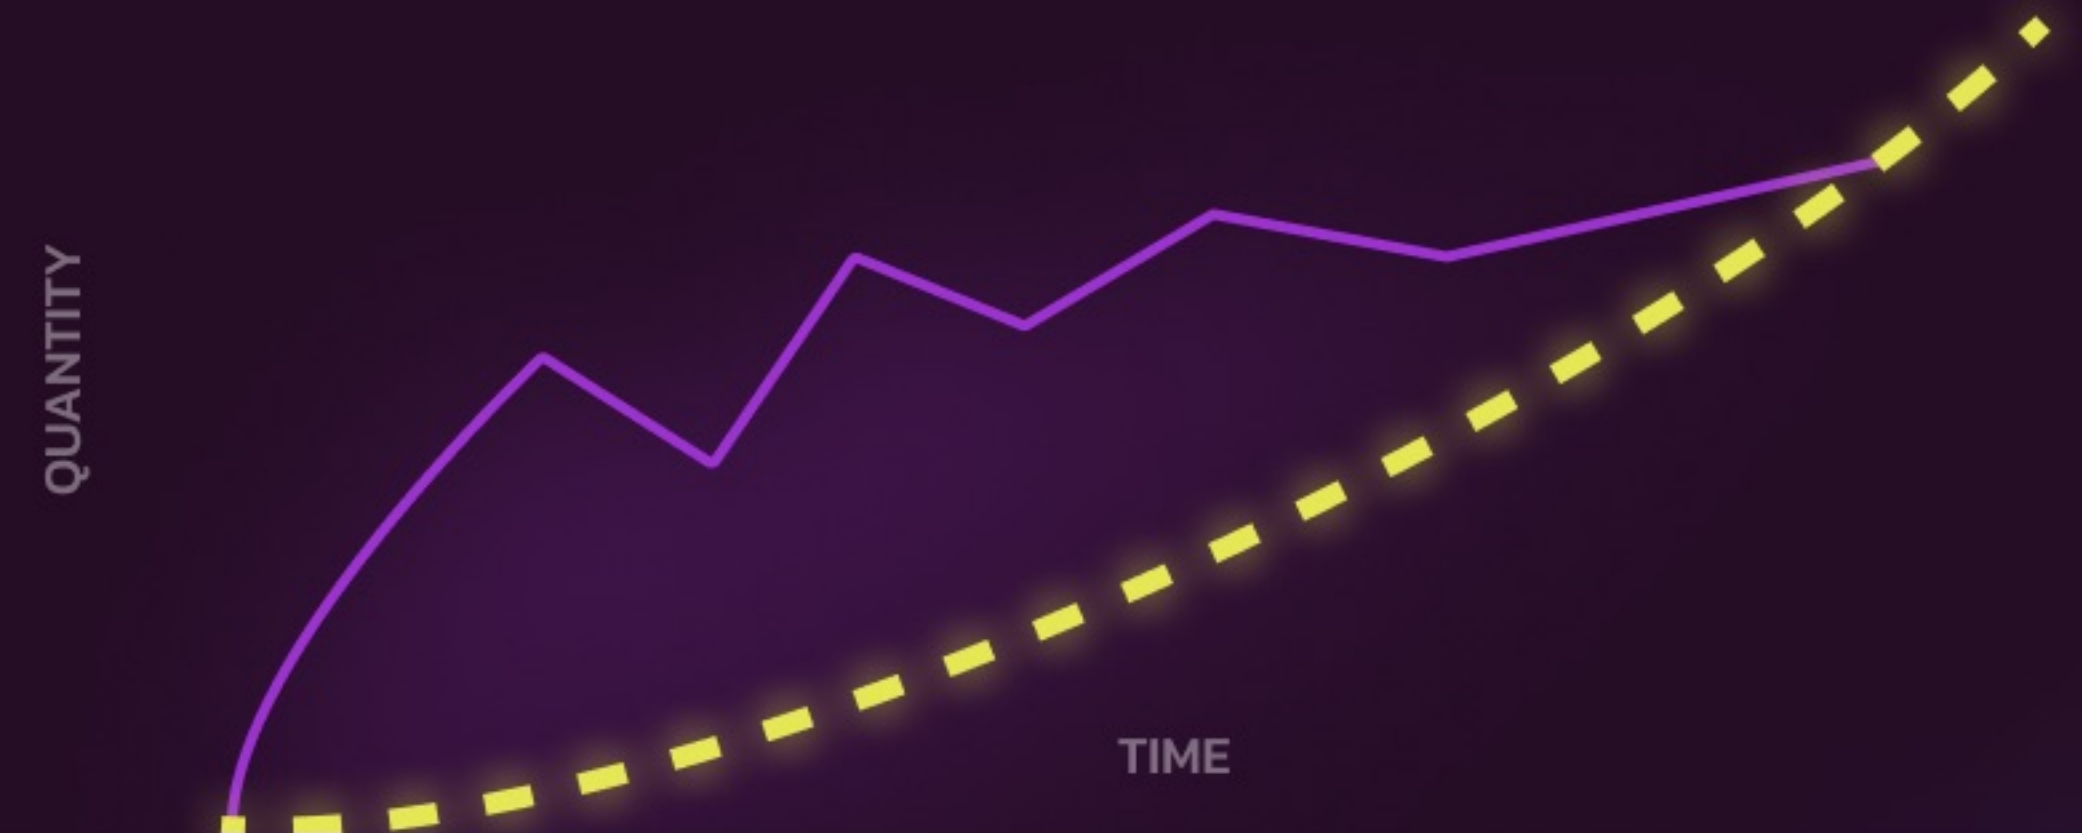

SUPPLY
PRICE

Other Protocols

By continuously minting tokens each block, this quickly results in a large token supply coupled with a negative price trend.

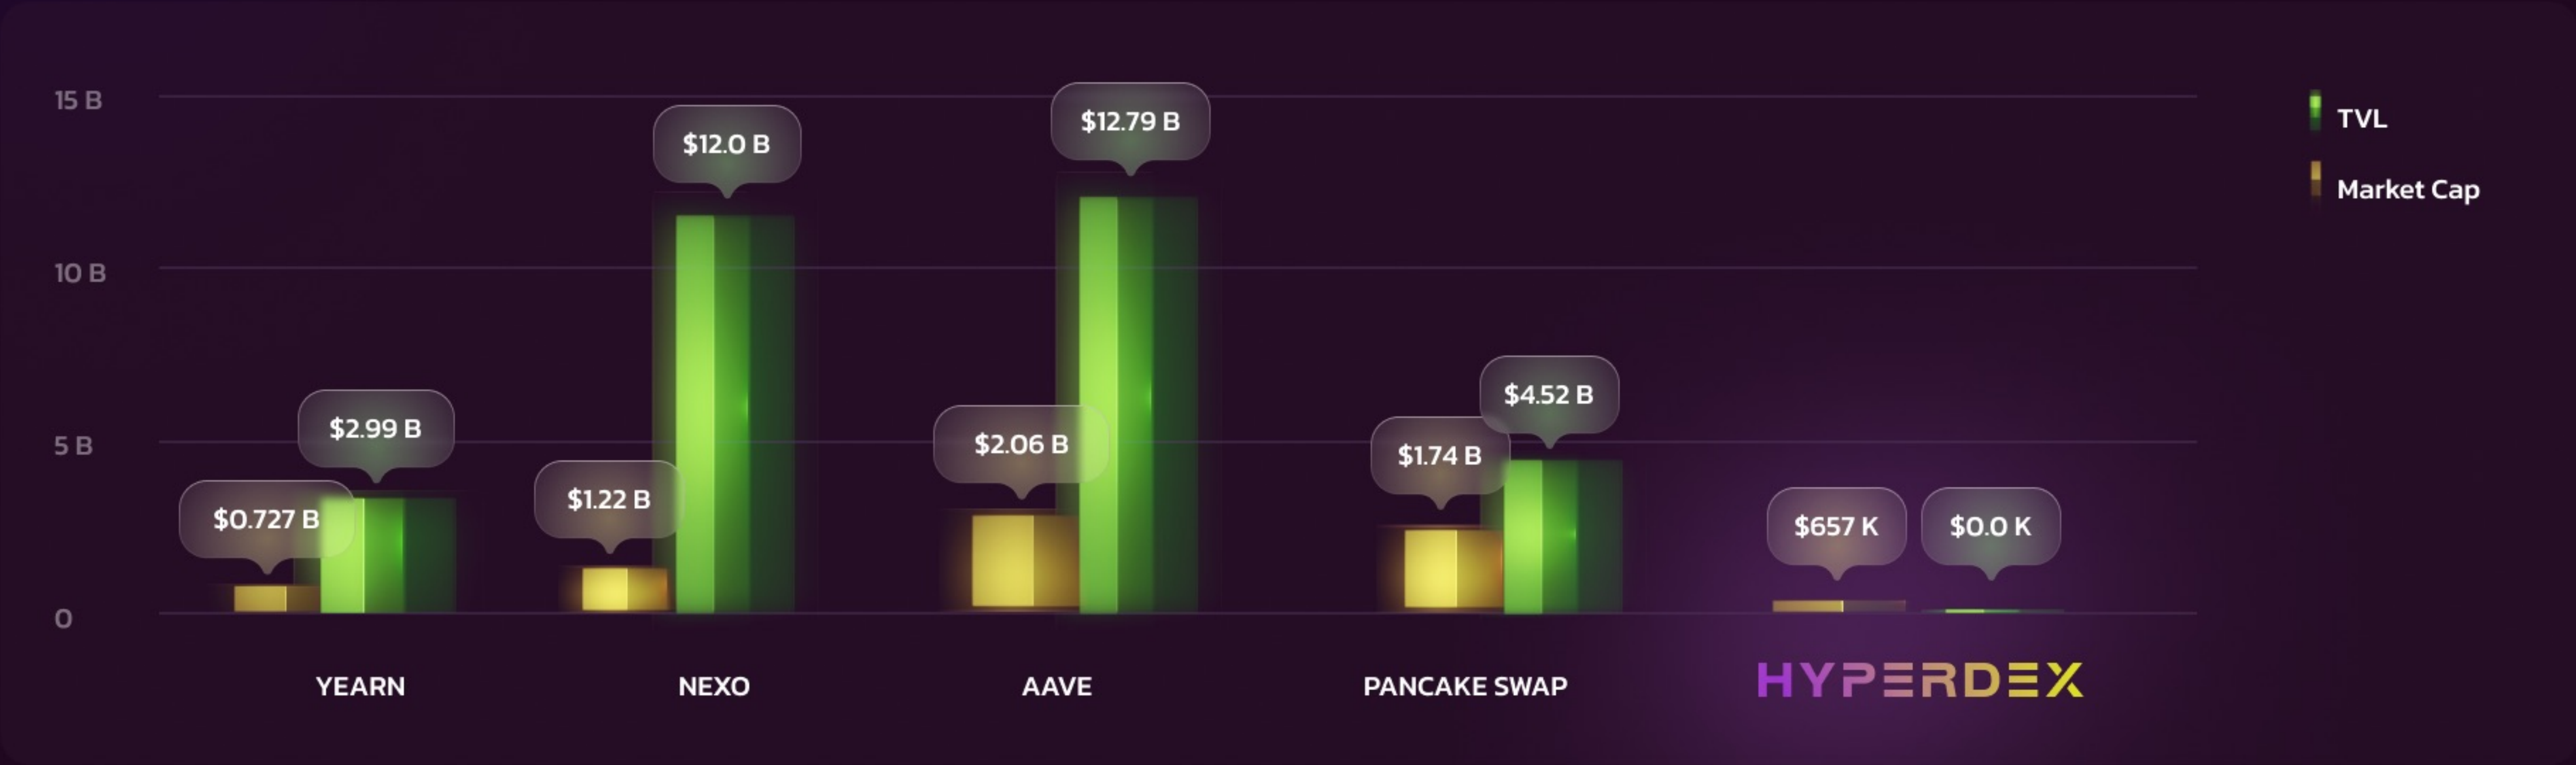

HyperDex

By only minting HYP tokens upon certain conditions that require the prior purchasing of HYP, this results in a steady increase in both token supply and price.

Market Cap & Total Value Locked Comparison

Based on the starting Market Cap and TVL granted full fundraising is complete

Hyper Token (HYP) Offering Phases

1

Private Pre-Sale: 20M HYP distributed at \$0.075

Vesting Period: first month 3% + 20 months linear distribution

2

Strategic Pre-Sale: 34M HYP distributed at \$0.15

Vesting Period: first month 4% + 18 months linear distribution

3

Public Pre-Sale: 5M at \$0.25, 15M at \$0.35, 20M at \$0.45

Vesting Period: first month 5% + 12 months linear distribution

4

IDO Phase: 6M HYP distributed at \$0.50**
